Education Kit for Secondary Schools**

Integrated Science and Hong Kong Country Parks

Have you ever related the teaching of Integrated Science with the country parks in Hong Kong? In fact, you can find a large number of animals and plants in there. By using this Education Kit, teachers and students will be able to appreciate our own natural resources through the teaching and learning activities.

This section of the Education Kit covers the following areas of study and topics:

Living things and observing animals

- Seven characteristics of organisms
- Importance and application of the characteristics in the natural environment
- How to observe an animal
- The Dos and Don'ts when observing wildlife?

Diversity of plants and animals

- Biodiversity
- Appreciation of biodiversity

Sorting things into groups (plants and vertebrates)

- Characteristics of plants and animals
- Using a key

Endangered species

- Conservation of endangered species in Hong Kong
